- (1) Spring (Mattress Support)

Youth Bed Post Cap

Allen Wrench

Back Frame

Front Frame

Hex Wrench

End Frame

Youth Rail

Back Posts

Front Posts

Side Rail

Mattress Support

CRIB ASSEMBLY INSTRUCTIONS

Step 1: To assemble the Back Frame to the Back Post you will need four 70mm Bolts and the Allen Wrench. Make sure that the bolts are not completely tightened until the Cap Rail of the Back Frame is against the top of the Back Posts. Tighten bolts at this time using your Allen Wrench. *Note in the photo how the posts are positioned.

Step 2: To assemble the Front Frame to the Front Posts you will need four 70mm Bolts and the Allen Wrench. Make sure that the bolts are not completely tightened until the Cap Rail of the Front Frame is against the top of the Front Posts. Tighten bolts at this time using your Allen Wrench. *Note in the photo how the posts are positioned.

Step 3: The third step in assembly is to attach the two End Frames to the front and back assemblies. For this step you will need eight 70mm Bolts and the Allen Wrench. The notched area of the upper end rail of the End Frame must be attached to the front of the crib. (See photo) Bolt the End Frames to the front and back assemblies using eight 70mm Bolts and the Allen Wrench. Tighten all bolts at this time.

Step 4

Step 4: The last step in crib assembly is to attach the Mattress Support (Spring) to the crib. Decide which position you desire to mount the Mattress Support (Spring). To mount the spring you will need four Spring Bolts and the Hex Wrench. Insert the Spring Bolts through the holes in the spring arms and into the inserts located in the four posts. Tighten using the Hex Wrench.

YOUTH BED CONVERSION (FROM CRIB)

Step 1: Remove the Front Frame from the crib by removing the four bolts that attach it to the Front Posts. You must leave the Front Posts attached to the End Frames.

Step 2: You must now attach the Youth Rail to the Front Posts. Using a hammer you must tap the two Tension Pins 1/2 way into the small holes located in the ends of the Youth Rail. You will now need two 70mm Bolts and your Allen Wrench. Insert the Tension Pins of the Youth Rail into the small holes located in the lower inside area of the Front Posts. Next you must insert the two 70mm Bolts through the holes in the post and into the inserts of the Youth Rail. Tighten using your Allen Wrench.

Step 3: You must make sure that the Mattress Support (Spring) is in the lowest position.

Step 4

Step 4: The last step is to attach the two Youth Bed Post Caps to the top of the Front Posts using the two 30mm Long Bolts and your Allen Wrench.

ADULT BED CONVERSION (FROM CRIB)

Step 1: To convert to an adult full size bed from a crib you must remove Mattress Support (Spring) and the two End Frames.

Step 2: The headboard and the footboard of the crib is the headboard and the footboard for the Adult Bed.

Step 3: To attach the wood side rails (packaged in the Adult Conversion Kit) to the headboard and footboard you will need eight 70mm Bolts and your Allen Wrench. The cleated side of the Adult Rail must be mounted towards the top during assembly of the Adult Bed. (See photo) Insert the 70mm Bolts through the holes in the posts and into the inserts located in the Adult Rails. Tighten all bolts using your Allen Wrench. (See photo)

ADULT BED CONVERSION (FROM SCRATCH)

Step 1: Follow Steps 1 & 2 of the crib assembly instructions.

Step 2: Follow Steps 2 & 3 of the Adult Bed Conversion (From Crib) Instructions shown above.

FOR FUTURE USE AND REFERENCE

RETAIN THIS INSTRUCTION SHEET AND THE CRIB TOOLS IN THE ORIGINAL SACK AND SECURE IT TO THE SPRING UNDER THE MATTRESS WITH PLASTIC TIES.

CARE INSTRUCTIONS: The natural warmth of wood is a lasting value. Character marks, checking and grain variations are part of the beauty of wood and, therefore, should not be a concern. If treated with care, this solid wood product will last you for many years to come. Once every week, wipe your Baby's Dream furniture with Pledge®, lemon oil or other similar wood treatment products. If you encounter any roughness in the finish of your new crib, fold a piece of regular white paper—not tissue or newspaper—and rub it gently against the surface until the desired smoothness is achieved. If refinishing, use a non-toxic finish specified for children's products. Let dry, sand with a very fine product such as folded paper or dish washing sponge and, finally, apply water-based baby-safe lacquer for the perfect matching shine.

WARNING!

To insure your child's safety and for your own peace of mind, be sure to follow instructions properly. Failure to follow these warnings and assembly instructions could result in serious injury or death. Before each usage or assembly, inspect the crib for damaged hardware, loose joints, missing parts or sharp edges.

- ✓ **DO NOT** use the crib if any parts are missing or broken.
- ✓ **DO NOT** substitute parts. Ask your dealer or write to Baby's Dream Furniture for replacement parts and instructional literature if needed.
- ✓ Make sure that all bolts and screws are properly tightened. **DO NOT** over- or under-tighten.
- ✓ **AVOID STRANGULATION:** As soon as an infant can sit or stand up, close the crib gate or raise the Drop Front permanently.
- ✓ **DO NOT** place the crib near a window where cords from blinds or drapes may strangle a child.
- ✓ **DO NOT** tie pacifiers, necklaces or any other items around a child's neck or on the crib parts.

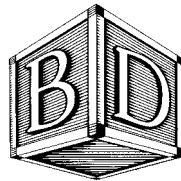

WARNING!

Strings can cause strangulation! Do not place items with string around a child's neck, such as hood strings or pacifier cords. Do not suspend strings over a crib or attach string toys.

- ✓ **NEVER** use plastic shopping bags or other film as mattress covers, because they can cause suffocation.
- ✓ For a newborn, adjust the spring on the highest level of the Height Adjuster and open the gate or lower the Drop Front for easy access.
- ✓ **DO NOT** leave a child in a crib with an open gate or lowered Drop Front. Be sure the gate is closed or the Drop Front is raised and locked in position whenever the child is in the crib. After closing the gate or raising the Drop Front, make sure the latches are secure.
- ✓ The child must be seated at the rear of the crib when lowering or raising the gate or Drop Front.
- ✓ As your child grows, adjust the height of the spring down so that he/she cannot pull himself/herself out of the crib. When the child is able to pull to a standing position, set the mattress to the lowest position and remove bumper pads, large toys and other objects that could serve as steps for climbing out. When the child is able to climb out or reaches the height of 35" (90cm), the bed should no longer be used in the form of a crib. You can continue to use this crib as a youth or toddler bed for another 2 to 3 years by using the **Youth Bed Conversion Kit**.

ANY MATTRESS USED IN THIS CRIB MUST BE AT LEAST 27¹/₄" X 51⁵/₈" WITH A THICKNESS NOT EXCEEDING 6". DO NOT USE A WATER MATTRESS WITH THIS CRIB.

This crib conforms to the applicable regulations promulgated by the Consumer Product Safety Commission.

This product may be covered by one or more of the following patents: D366,778; D366,970,5,077,846 and other patents pending.
